Mr. Harper,

I am outraged by you lack of responsible behavior. Not only have you taken ETI to the tune of \$200,000 I have found out you also did this to another staffing agency. How dare you!!! I will not only make you pay I will make sure your name is known throughout the staffing industry nationwide. I will muddy your name and IRP's with the federal government. I will legally make sure everywhere you go I will put a lien on any and all contracts. Wherever you go I will be right there.. I have any excellent relationship with the Federal government especially with the SBA. You can't be a con artist for much longer Mr. Harper. And IF YOU THINK you can continue your current activities by just jumping from one to another staffing agency you do not know the network the staffing industry has. I suggest you pay up and pay up now! I demand you and IRP pay your debts.

Too bad Demetrius you are the one that will have to face the almighty on judgement day. You have taught me a valuable lesson, don't tell me about slander you are the one that made the choices. I was never praising you I was trying to support you

One of two things will happen; you will pay or I will sue you personally and your company and chase you into bankruptcy. Also I will sue IRP and chase them into bankruptcy. I will bury you legally, understand I have two lawyer partners that will not let you off the hook. Let me tell you our action plan. We will pull all the complaints that have been filed against you, Job Store, Manpower, Today's Staffing, Professional Business Associates and ours, then we put together an advertisement and have them published in nationwide law enforcement publications and homeland security publications . You said your name is very important to you Mr. Harper we will print the truth and the public will read the truth about you and your name will be destroyed. Oh and by the way I want your Cadillac and Audi .

Importance: High

Susan,

It's unfortunate that you have resorted to slandering and 'mud-slinging', as I told you before ETI Professionals will get every penny of the amount due. I find it odd that you would only weeks ago give me the highest praise and now you are on some sort of personal vendetta to 'run-me down' as well as IRP. Bad move, but that is your choice. It will be such a relief when ETI Professionals has the money that is owed (\$200,000 and change).

My name is the only thing that is important right at this moment, and yes, it has suffered some, but I must look at the good that will come from putting my neck on line to bring something so powerful that it will change the way things are done here in America and abroad. As of yet, the agencies are still reviewing the solution and have not been expeditious in moving forward. "Pay up and pay up now!" For a moment think of this, do you think I am just setting here on like 10 million and NOT paying you, that is not the case, if I had to do... I would. Again ETI Professionals will be paid in full, as such a time as DKH Enterprises cash flow resumes.

Thank you again, and you have a blessed day!

Regards,

Demetrius Harper
President

Subject: Helping Colorado Staffing Agencies

I am a member of ASA and not the local chapter but I feel obligated to get the word out about a scam that has rendered several Colorado Staffing companies with substantial bad debt. The company's name is DKH Enterprises located in Colorado Springs, the President is Demetrius Harper. They ask you to payroll computer programmers for a software development project, they refer the contractors to you. They ride the wave until you pull the employees. Several staffing companies have already filed a civil suit and ours is pending. If you want to know approximately the collective dollars lost to bad debt is in the 100's of thousands Please communicate and alert your members to be very cautious.
